

# SHRI UMIYA KANYA MAHAVIDYALAY, RANGWASA RAU

## **Bachelor of Science (Seed Technology)**

**Subject Combination=(Seed Technology + Botany + Chemistry)**

### **Bachelor of Science Seed Technology programme objectives**

In seed science and Technology, students are taught the growth and the information of seed from the process of fertilization of the egg cell on the maternal plants as long formation of new plants from the seed. Seed Technology is a professional subject for Agricultural sector.

#### **Career opportunities in seed technology-**

In seed science and Technology students can make their career in the Horticulture industry, Nursery farms, plants breeding centre and also in research laboratories.

After obtaining a Seed Technology degree, students can start their own business, apart from aspiring for government jobs. For this the students need agriculture license, so that they can engage themselves in the following business entrepreneurship such as:

1. Seed shops
2. Fertilizer shops
3. pesticide shops
4. Seed processing units etc.
