Master of Science (Chemistry)

Master of Science Chemistry Programme Educational Objectives

Chemistry is a very important branch of science because everything you do is Chemistry. All matter is made of chemicals, so the importance of chemistry is that it's the study of everything. Chemistry plays an important role in our life, because everything has chemical composition.

Food, drugs, soaps, clothes, papers and all things around us are made of chemicals. Even our entire body is made of chemicals. M.Sc. Chemistry offers a number of job opportunities for chemistry students. They can work in chemical manufacturing factories, pharmaceutical companies, laboratories, research centres, education field, etc.
